

Thomas Jefferson High School Key Club

Key Club International, the largest student-led organization in the world, provides its members with leadership opportunities as they serve their home, school, community and children of the world. The vision is to develop competent, capable, and caring leaders for tomorrow through the vehicle of service. At Thomas Jefferson High School, key club is one of the school's largest clubs with over 165 paid members who are excited and committed to serve!

Thomas Jefferson Key Clubbers participate in a variety of interesting, community-based projects. Members have volunteered at the West Hylebos Wetlands Park, planting trees and shrubs and spreading mulch. They even extended their service to neighboring Tacoma, where around 30 members helped sort and organize food for the Tacoma Food Connection during the Thanksgiving holiday. Jefferson Key Clubbers also helped greet and usher guests of the Knutzen Family Theater's various seasonal productions.

Some of our key club's ongoing projects include helping out at Star Lake Elementary School for after-school athletic activities and tutoring; mentoring kids for Big Brothers and Big Sisters; Coats for Kids, a service project which collected coats for students at a local elementary school. Each Christmas season the Jefferson Key Clubbers join their sponsoring Kiwanis club, the Kiwanis Club of Greater Federal Way, in the Community Food and Toy Drive, during which toys and food is collected for 100 local families, making the holiday season a more happy one for over 400 needy children.

Our Thomas Jefferson High School Key Club continues to be very active throughout the school year and well into the summer. The Kiwanis Club of Greater Federal Way deems itself fortunate to be able to support this group's efforts each month. To show our appreciation we present a number of scholarships to outstanding Key Club members each year. For more information on this scholarship contact our club's secretary at our websites email or download scholarship information here.
